

# PERSONAL PROTECTION MASK 2020 PRICE LIST

These Personal Protection masks were carefully designed with several things in mind: Safety, Comfort, Fit and Function. Together with a local company who is ticketed in Pattern Making and Design we came up with this exclusive mask. Specialized “darts” were placed on each one to provide a custom fit. These masks fit snugly to provide the utmost protection; a mask that is loose fitting will allow unwanted particles to flow more freely. Our masks are made with 100% cotton that is breathable and soft. They are double layered with a unique pocket for a replaceable filter.

The filters you receive will either be a Polypropylene Fabric or Polyester Hydro Knit fabric. These filters have shown to increase mask efficacy up to over 90%. Double layer fabric masks without a filter have shown less than a 60% filtration. Although these masks cannot be rated as N95 or a Surgical mask and there are no official tests that can provide certifications at this time; we have done our research and are confident in these two selections.

Personal Protection Masks can help reduce the spread of COVID19.

## AS RECOMMENDED BY THE CDC; CENTRE FOR DISEASE CONTROL A FABRIC FACE MASK SHOULD:

- Fit Snugly and comfortable against the side of the face
- Be secured with ties or ear loops
- Have multiple layers of fabric
- Allow for breathing without restriction
- Be able to be laundered and machine dried

## HOW TO USE YOUR MASK:

- Wash your hand with soap and water or use a hand sanitizer before applying your mask
- Take a freshly laundered mask and separate the two layers of the mask, insert the filter with the long edge on top
- Tie the top of the mask at the back of your head above your ears (The widest part of the mask is the top)
- Tie the lower part of the mask behind your head at the nape of the neck
- Ties can be shortened to a customized length, everyone has a different head size

## TO REMOVE YOUR MASK:

- Wash your hands or use a hand sanitizer
- Untie the top, using the ties pull the mask down from your face
- Untie the bottom and pull the entire mask away from your body
- Remove the filter and discard in the garbage

## HOW TO CARE FOR YOUR MASK:

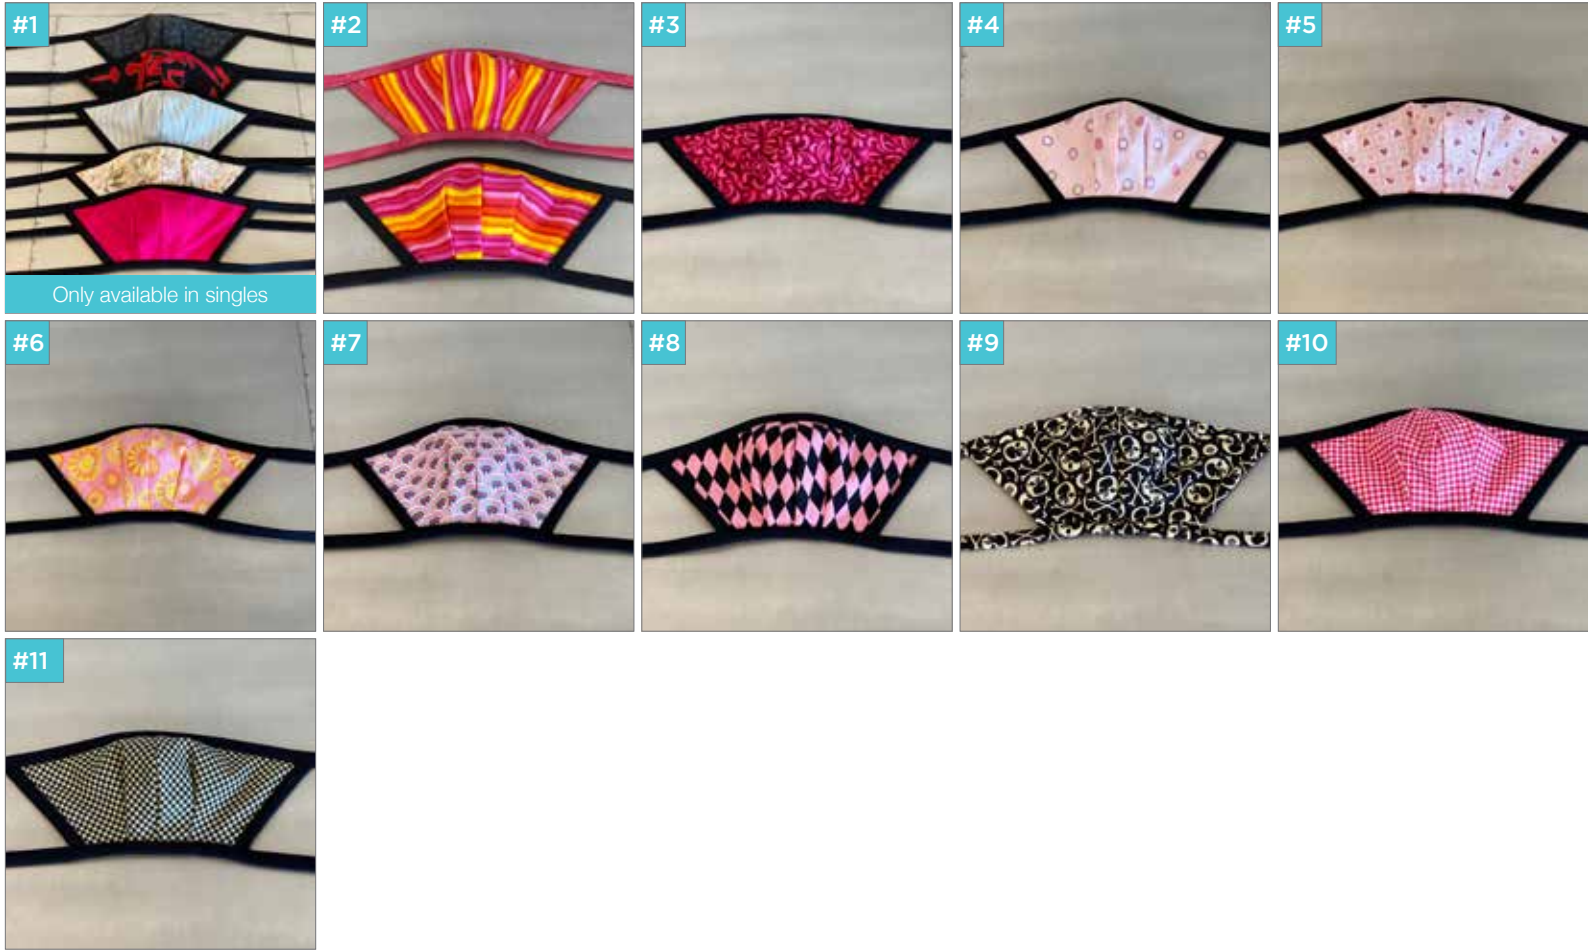

- Your mask should be laundered after EACH wear or at minimum daily after wearing it
- Place your mask in your laundry machine and wash in HOT water
- Please your mask in the dryer on LOW
